THE JASPER SOLUTION

QUALITY REMANUFACTURED ENGINES & TRANSMISSIONS

For Thousands More Miles

THE ISSUES...

NEW VEHICLES

- Lose \$2000 - \$3000 in value right out of the showroom
- In the first two years, wholesale value depreciates by 35-50%
- In 3 years an average new car loses 54% of the original purchase value
- New vehicles carry higher tax, licensing and insurance costs

USED VEHICLES

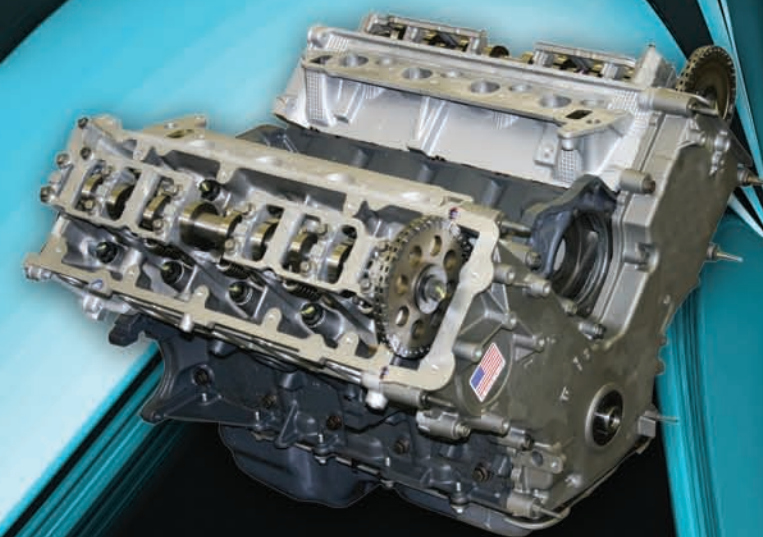

- Lose \$1000 - \$1200 in value when they leave the lot
- May have a minimal warranty, if any
- May have hidden problems requiring expensive repairs

JUNKYARD PARTS

- May have high miles and a poor maintenance history - a failure waiting to happen
- May have come from a vehicle that was involved in an accident and might have unseen damage

REBUILT & OVERHAULED ENGINES & TRANSMISSIONS

- Overhauls generally replace only severely defective parts
- The quality of rebuilds varies widely
- Often come with only minimal warranty

WHEN YOUR VEHICLE QUILTS...

You know that sickening feeling of indecision. What is the best choice - new car, a newer used car, a junkyard engine or transmission? There is a reliable and much less costly option. A JASPER Remanufactured Exchange Product is your best solution!

BUT IT SHOULD HAVE MILES TO GO!

And you can get thousands more miles by choosing a JASPER Remanufactured Engine or Transmission. Drivetrain components remanufactured by JASPER are as good as or better than new but a much less costly solution than replacing your good old four-wheeled friend!

**YOU CAN DEPEND ON
JASPER**

Quality Is Built into Every Remanufactured Engine

- **Updated procedures** – remanufactured to meet or exceed original specifications by correcting OEM design flaws and improving performance.
- **New and Qualified Parts** – all new and remanufactured parts are carefully inspected for correct tolerances to assure dependability. Wear items – pistons, bearings, valves, springs – automatically replaced with every engine!*
- **Meticulous Cleaning** – after disassembly, all components undergo multiple cleaning processes to assure quality product remanufacturing.
- **Precise Machining** – Boring, honing, and resurfacing correct wear in critical areas.
- **Testing** – live-run testing to assure proper operating conditions before shipment.

* Import engines receive new or re-qualified valves & springs.

THE JASPER SOLUTION

Your Vehicle Repair Dilemma

When faced with the need for expensive repairs, you quickly review your options. A new car would be nice, but it will depreciate rapidly and brings a hefty payment and high ownership costs. A used vehicle may not cost quite as much but can come with hidden problems that will lead to expensive repair bills. If you buy junkyard components, you may save money on the purchase, but you may also buy parts that have suffered abuse and damage and will not serve you well at all. And rebuilt engines or transmissions can cost less, but the quality of the work may be inconsistent, and the parts may have only a minimum warranty.

3 Year / 100,000 Mile Transferable, Nationwide Parts & Labor Warranty

Choose JASPER with confidence. Every JASPER remanufactured engine and transmission is backed by a Transferable, Nationwide 3 Year / 100,000 Mile Parts and Labor Warranty. For even greater peace of mind, a Premium Service Plan that includes towing and car rental is also available. We gladly supply a full warranty disclosure upon request.

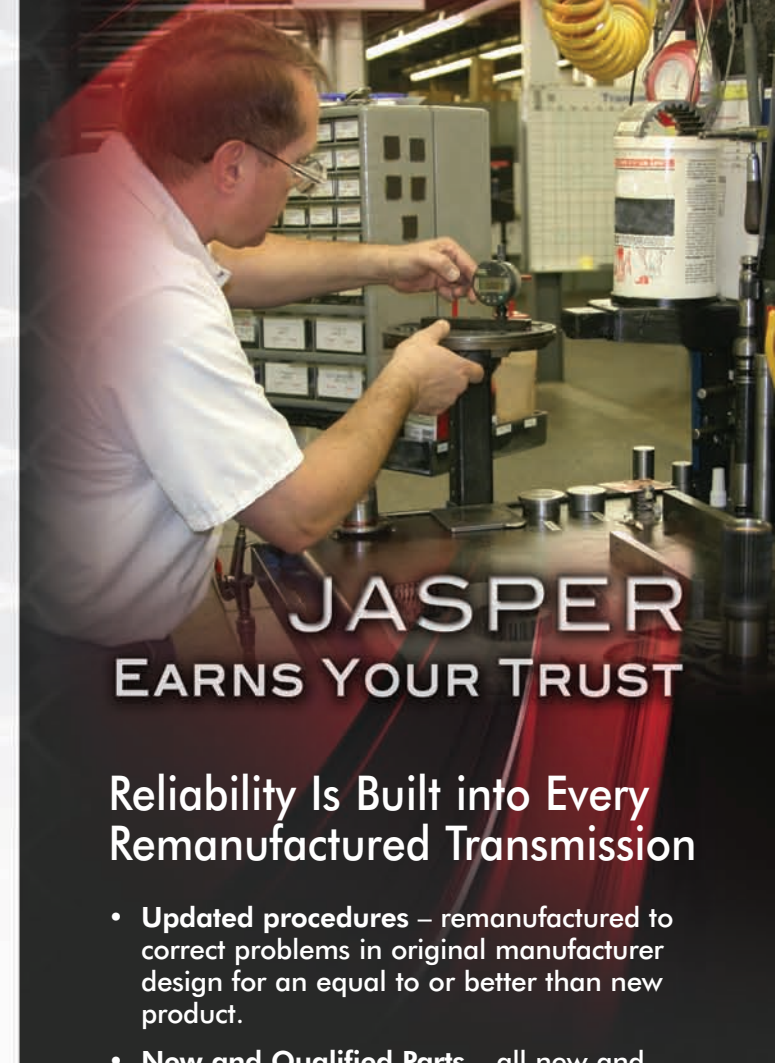

A Technical Hotline and 24/7 Emergency Warranty Information are also available at (800) 827-7450

JASPER Remanufactured Engines and Transmissions are the Right Solution!

- Quality and reliability at a fraction of the cost of a new or newer used vehicle
- Significantly faster and more dependable than overhauling an engine or transmission
- Less time without your vehicle and decreased rental vehicle costs
- Minimal disruption of your daily activities
- 3 Year / 100,000 Mile Transferable, Nationwide Parts & Labor Warranty
- No monthly vehicle payment means more cash on hand for you and your family
- Recycling old engines and transmissions benefits the environment

If your four-wheeled friend is otherwise in good shape, choose a JASPER remanufactured exchange engine or transmission.

IT'S THE RIGHT DECISION.

**JASPER
EARNS YOUR TRUST**

Reliability Is Built into Every Remanufactured Transmission

- **Updated procedures** – remanufactured to correct problems in original manufacturer design for an equal to or better than new product.
- **New and Qualified Parts** – all new and remanufactured parts are carefully inspected for correct tolerances to assure dependability.
- **Quality Control** – all areas of the transmission are closely scrutinized for cleanliness, surface finish quality, lubrication, clearances and wear patterns.
- **Valve Bodies** – carefully remanufactured to give the same shift quality and "feel" as new.
- **Torque Converters** – Dynamic balancing eliminates vibration that can lead to transmission damage.
- **Dynamometer Testing** – live-run testing simulates in-vehicle operation to assure trouble-free performance.
