

The MotorVac CarbonClean Service Will Help You Enjoy the Rewards of Vehicle Maintenance:

1

By Saving You Money on Gasoline Bills and Costly Engine Repairs.

2

By Giving Your Car Back the Power to Perform at an Optimum Level.

3

By Bringing You "Peace of Mind on the Road". After All...Driving Should Be a Pleasurable Experience.

Automotive Maintenance And Repair Association Recommends Annual Fuel System Cleaning Service

The Automotive Maintenance And Repair Association (AMRA), a Washington, D.C. - based trade association, recommends a fuel system cleaning service every 15,000 to 18,000 miles. The MotorVac CarbonClean service is the most complete and effective fuel system service. For more information, visit us on the internet at www.motorvac.com or ask your technician.

MOTORVAC CarbonClean SYSTEM

because clean engines run better

Carbon Build-up: Your Vehicle's Unseen Enemy

Millions of cars today run at a level of efficiency considerably reduced, due to the high concentration of carbon deposits accumulated in the fuel injection system, intake valves, combustion chambers, oxygen sensor and catalytic converter.

Carbon build-up clogs fuel filters, reduces fuel flow, distorts fuel spray patterns, limits fuel atomization and decreases combustion efficiency.

Carbon build-up gradually robs your vehicle of performance and fuel economy, and may cause numerous problems such as engine malfunction, high emissions, excessive fuel consumption, loss of performance, rough idling and hard starts.

Harmful emissions are a common problem caused by carbon build-up.

If you are getting fewer miles of driving per gallon of gasoline, your car may be suffering from carbon build-up. It's time for a MotorVac CarbonClean Service.

Combat Engine Contamination

Give your car the
MotorVac CarbonClean Service

MotorVac CarbonClean Service: A New Concept in Vehicle Maintenance

Unlike the traditional method of dealing with contamination or carbon build-up, which only cleaned the injectors, the MotorVac CarbonClean Service is a total engine cleaning and decarbonizing system that gently strips away the levels of carbon deposits in your vehicle from intake to exhaust, without disassembling the engine or removing any components.

The dirty valve on the left will act like a sponge and cause drivability problems

The **MotorVac CarbonClean System** cleans the entire air intake, fuel system and exhaust system.

What Will a MotorVac CarbonClean Service Do For Your Vehicle:

- **Repair Drivability Problems**
(hesitations, hard starts, rough idling or lack of power)
- **Restore "New Car" Performance**
- **Reduce Harmful Emissions and Smoke Opacity**
- **Extend Fuel System Component Life**
- **Restore Fuel Economy**

The **MotorVac CarbonClean Service** can improve vehicle performance in a matter of minutes.

A **MotorVac CarbonClean Service** will help your engine function more efficiently by unclogging accumulated carbon deposits from fuel injectors and other engine components.
